DETAILED ACTION

EXAMINER'S AMENDMENT

1. An extension of time under 37 CFR 1.136(a) is required in order to make an examiner's amendment which places this application in condition for allowance. During a telephone conversation conducted on June 7 2004 requested an extension of time for 1 MONTH(S) and authorized the Director to charge Deposit Account No. 132759 the required fee of \$55.00 for this extension and authorized the following examiner's amendment. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

The application has been amended as follows:

IN THE CLAIMS:

2. Claim 16 line 1 has been amended to delete "wherein; a)" and replace this with --wherein step a further comprises --.
3. Claim 17 line 2 has been amended to delete "includes;" and replace this with --includes in step b) the additional step of--.
4. Claim 18 line 2 has been amended to delete "a)" and replace it with --d)--.
5. Claim 19 line 1 has been amended to delete "Claim 8" and replace this with --Claim 18--
6. Claim 19 line 2 has been amended to delete "a)" and replace this with --said step d) further includes that --.

Art Unit: 3677

7. Claim 19 line 4 has been amended to delete "b)" and replace this with --and said step d) further includes that --.

Reasons for Allowance

8. The following is an examiner's statement of reasons for allowance: Examiner has reviewed in detail patent USP 4721418 and notes that it is the smooth sleeve itself which is connected to the pile, not a collar for holding the sleeve, and that the pile sleeve is placed about the pile prior to backfill earth being filled about the pile. This is structurally and functionally different than the method of installing the anti-jacking pile system of the present invention, which has a collar attached onto the lower end of a pile, said collar adjacent the bond breaking material such that the pile can be driven into earth with the collar protecting the bond breaking material's leading edge. Howard USP 3630037 teaches a similar pile structure but not a similar method, in that the pile of Howard is inserted in a drilled hole, and then the rubber sleeve is placed about the pile.

9. A "structure" is considered a slightly broader limitation than a "building", but examiner considers that it would be considered an obvious variant in terms of a method of installing an anti-jacking pile system. Applicant has filed a terminal disclaimer over the related case USP 6616381, which claims the narrower "building".

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
